About

Research Department

The department is at the centre of the Library's development of research-based library services, and at the same time it forms a bridge between the library services and the research environments that the library services support. The employees in the department have research competence, with backgrounds from within and outside of SDU. As far as possible, the employees in the department are affiliated with SDU institutes at the level of senior lecturer or professor, and they conduct research both internally and in collaboration with other SDU researchers and researchers from other institutions.

UPDATE AND NEW OPPORTUNITIES IN PURE

After the latest Pure update, it is now possible to upload a Hero image (cover picture) and a video to your unit profile in the Research Portal. We would also like to remind you that it is possible to add a text about your unit as a presentation of your department or centre at the Research Portal. Just send a text, hero-image or video to the Pure office, then we will make sure to upload it to your unit profile.

[See example](#) or [see guide](#)

FREE OPEN ACCESS PUBLISHING WITH ELSEVIER

With the new agreement between Elsevier and most of the Danish research institutions, it is now possible to publish OA for free in certain Journals from Elsevier. The costs for publishing for free will be paid by the Library's licences agreements. View a [full list of journals covered by the agreement](#) or contact open-access@bib.sdu.dk.

To get Open Access covered by this agreement the following must be taken in consideration:

- The article must be submitted between January 1st 2021 and December 31st 2024.
- Corresponding Author must be affiliated to SDU, a University Hospital in the Region of Southern Denmark or one of the other Danish universities which is part of the agreement.
- Corresponding author must choose to publish open access when the article is accepted in one of the journals included in the agreement. Corresponding author can then choose from two available open access licenses, CC BY or CC BY-NC-ND.

CONTENT FROM SDU RESEARCH PORTAL INDEXED IN SUMMON

All publications from The Research Portal are now indexed in Summon; the library's search engine. In this way, the research publications at SDU becomes much more visible to the users of SDU's library in general.

See our colleagues PhD thesis which is open access from SDU's Research Portal: [Link to Summon search](#).

END OF THE PUBLICATION YEAR 2020

The publication year 2020 has been completed in Pure 1st of March. We have validated everything that has been published and moved those publications to 2021, which has not yet been published during 2020. In total, we have validated 7840 publications. We are now preparing them for Open Access and BFI harvests, while we continue to validate 2021 publications.
