

Unit branding opportunities in the Research Portal

This document contains a description of the branding and customization opportunities available in the Research Portal¹. All mentioned possibilities can be added to all types of units in Pure – department, office and centers alike.

To get a Hero Image, an imbedded video, a text or basic information added to your unit page in the Research Portal send the relevant data or information to the pure Office at puresupport@bib.sdu.dk. Please remember to include the name of the unit, so we know which unit to upload to.

To get an existing Hero Image, video, text or basic information replaced send the new data or information to the Pure Office.

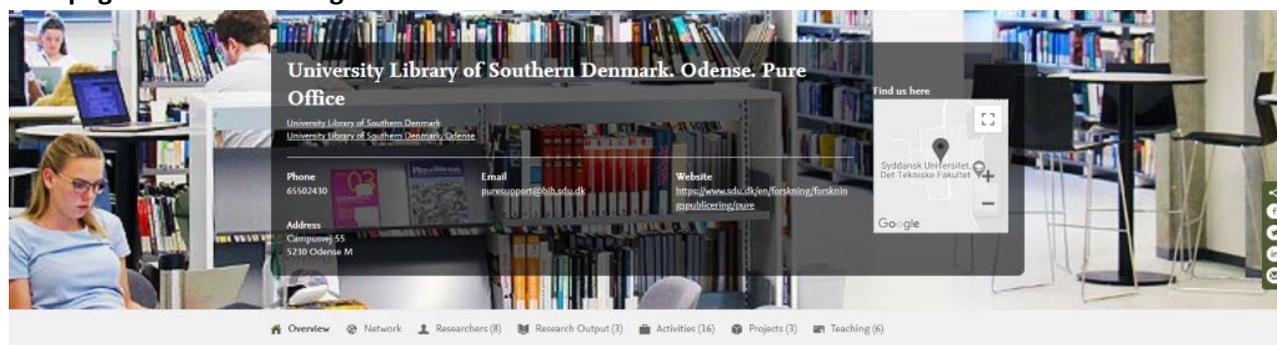

If you wish to have the Hero Image or the video replaced at regular intervals, we can give a unit secretary or another relevant person rights in Pure to do the replacement themselves.

Hero Image

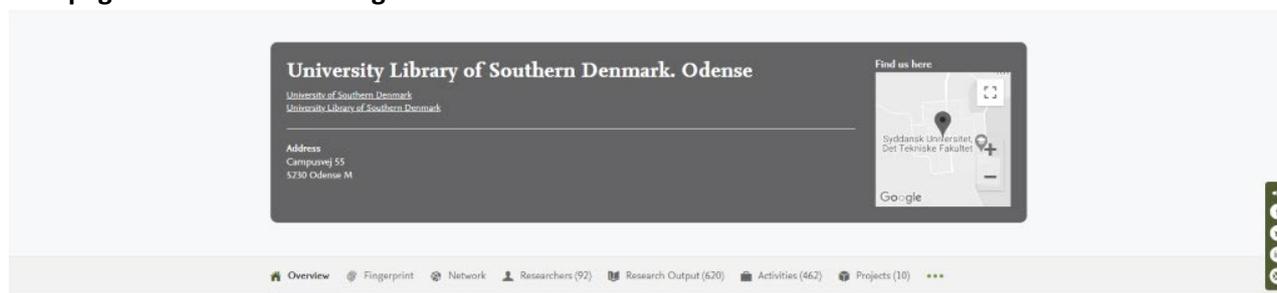

After the latest Pure update, it is now possible to add a Hero Image to your unit page in the Research Portal. This gives you the ability to visually brand your unit.

A Hero Image must be 300 pixels high and 1920 pixels wide.

Unit page with a Hero Image:

¹ NOTE: Images used below are from the Pure-system test Portal. The images do not reflect how the units appear in the Research Portal at <https://portal.findresearcher.sdu.dk/en/>.

Imbedded video

With the new Pure update, it is also possible now to imbed a YouTube or Vimeo video on your unit page in the Research Portal. This gives you the opportunity to visually present your unit to page to visitors.

Organization profile

It is possible to add a written introduction of your unit on your unit's page in the Research Portal. The text can be used to present your unit to visitors.

If you wish a description added to your unit page, we hope you'll provide the text in both Danish and English, since the Research Portal is available in both languages.

If both a text and a video is added to your unit, then the text will be placed after the video.

Organization profile

The Pure Office at the University of Southern Denmark is responsible for the administration of the university's Pure-system. Pure is the name of the research registration system used at the University of Southern Denmark to register the university's researchers and their research - which is displayed in this Research Portal. The Pure Office is therefore responsible for the daily operation of Pure and the Research Portal.

Other areas of responsibility of the Pure Office includes; research registration, the Bibliometric Research Indicator (BFI), Open Access, Open Access monitoring, managing SDUs Open Access Fund and ORCID.

Organization profile

Through its research, innovation and study programmes the department will contribute with solutions to global social and environmental problems. We will help create growth and prosperity through technically sound engineering solutions that integrate other disciplines. The department will be a gateway for lifelong learning for employees, students, and project and network partners.

By means of various forms of cooperation such as internships, student projects, networking and research projects with the Industry and other public research institutions, there is a constant exchange of experience and knowledge which ensures that all parties have access to the latest and most relevant knowledge.

Research Areas

- Chemical process engineering
- Functional materials and fuel cells
- Biomass technology
- Processing of vegetable raw materials for food, feed and natural medicine
- System analysis and environmentally efficient technology
- Biosystems technology

The department is divided into three sections, each with a specific research area. Follow the below links and read more:
