

CelebrateMS

Celebrating 50 Years of Mass Spectrometry Research at the University of Southern Denmark

Advances in Biological Mass Spectrometry

December 3-4, 2024, University of Southern Denmark, Odense, DK

Conference

We celebrate the **50-year anniversary** of biological mass spectrometry research at SDU by hosting an international conference on advances in mass spectrometry.

This 2-day conference provides a forum for presentations and discussions of basic and applied biological mass spectrometry research. The conference brings together world-leading mass spectrometry researchers, with a focus on technology developments and advanced bioanalytical strategies, including computational data analysis, for studies of biological systems. We strive to create an atmosphere of scientific excitement for sharing knowledge and networking.

Participants are encouraged to submit abstracts for poster presentations. Selected abstracts will be invited for oral presentations.

Plenary Speakers

Ruedi Aebersold, ETH Zürich, CH
Morten Thaysen Andersen, Macquarie University, AUS
Perdita Barran, University of Manchester, UK
Ileana Cristea, Princeton University, USA
Klaus Dreisewerd, University of Münster, D
Neil Kelleher, Northwestern University, USA
Lennart Martens, University of Ghent, B
Andrea Sinz, University of Halle-Wittenberg, D
Judith Steen, Harvard Medical School, USA
