### **New Faces**

Welcome Milad Bahadori!

From January 2025, Milad will begin his Ph.D. project with CUHRE, where he will delve into the emotional and narrative dimensions of the relationship between humans and nature. The project focuses on barriers to biodiversity and examines the conflicts surrounding rewilding in Denmark, particularly at the Mols Laboratory, with a special focus on the narratives and emotions that drive both support and opposition. Based on this, the project will contribute to the discussion on wild nature and eco-literacy in Denmark.
