Emerging Trends in Optics

CAMPUS HOUSE, Campusvej 1, Odense

The workshop will take place at Campus House (Campus Kollegiet) – a distinct 14-storey building at Campusvej 1, Odense. We have allocated three rooms for the workshop: Sky room on the 14th floor for oral presentations, and Cloud and Rainbow rooms on the 13th floor for posters and meal breaks. You will have to use code **224466** to operate the elevator. Simply type in the code on the panel in the elevator and press "OK". After that, just select your floor.

How to come here:

- **By public transport:** use a city tram (Odense Letbane, odenseletbane.dk) to travel until stop "Campus Odense" (see its map on the next page). If you miss the stop, you can also walk from the next 'SDU University" stop.
  Note: you cannot buy tickets inside the tram! Buy it instead online at letbanebillet.dk (the same link can be found by scanning QR code on tram stops) – it costs 15 kr, valid for both city busses and the tram within 75 minutes from the purchase. For Danish residents: you can also use Rejsekort, which will cost about 20-25 kr.
  Note: if you are travelling with intercity train (for example, from Copenhagen to Odense), then a standard ticket (not orange!) also includes **free** connecting public transport in both departure and arrival cities.

- **By car:** you can drive directly to Campusvej 1, Odense, and park your car here for free.
  Note: you have to register your parking on the iPad located in the office on the ground floor of Campus House for parking within period of 8:00 – 13:30.

Internet:

- You can access the internet via *eduroam*
- For guests, there is internet access via *SDU-VISITOR*. After selecting this network under your WIFI settings, you will be prompted to create a temporary login. Once you have done that, you will receive a code to access the internet.
