

# Curious today – partner tomorrow

With a growing interest in the robot laboratories at SDU, we have decided to open our doors twice a year.

We invite the robot industry, and others who are interested in our labs and our work, to participate in presentations and discussions in our robot labs, discuss the potential for collaboration, and network with likeminded souls.

We will begin the tour in our Industry 4.0-lab, and we can't wait to share our knowledge and research with you. You will meet students, companies, and academic experts, and we look forward to seeing you here!

Participation is free, however limited.
