

# The Eruption, Implosion, and Future of Radical Environmentalism

Friday, March 24, 11-12  
CML meeting room/  
Hybrid participation

Professor Bron Taylor,  
Religion, Nature and  
Environmental Ethics,  
University of Florida

Considering the environmental crisis so grave that civil disobedience and sabotage were seen as necessary to prevent extinctions and protect wildlands considered sacred, the environmental movement Earth First! has a remarkable history. Bron Taylor's lecture will analyse its trajectory and discuss the future of radical environmentalism.

Bron Taylor is an interdisciplinary environmental studies scholar whose research explores, through the lenses of the sciences and humanities, the complex relationships religion, ecology, ethics, and the quest for sustainability. In 2017 he was recognized with a Lifetime Achievement award by the International Society for the Study of Religion, Nature and Culture. See also [www.brontaylor.com](http://www.brontaylor.com)
