

Teaching portfolio

Candidates for professorships and associate professorships at the Faculty of Engineering must enclose a teaching portfolio to the application.

The portfolio must cover the areas stated below although not necessarily in the stated order. Other relevant areas may also be included.

A guide to the teaching portfolio model (UVP) used by the Faculty of Engineering can be found here <http://uvp.sdu.dk>.

Educational CV:

1. Fundamental pedagogical view:

A description of the pedagogical ideas that form the basis for the selection of your teaching methods in relation to practice.

2. Teaching experience:

Previous teaching experience, preferably in tabular form.

3. Formal pedagogical education:

Examples:

- Basic teacher training course in the scope of IPN/DACIN/IUPN
- Professional postgraduate teacher training for university lecturers
- Professional postgraduate teacher training for upper-secondary school
- Master's degree in educational theory

Description of practice:

Description of the practice which characterises your teaching, including selected examples from your teaching.

- Teaching content and learning objectives.
- Teaching and evaluation methods, including consideration of strengths and weaknesses in the methods chosen.
- External factors that may have an influence (other program elements, co-teaching, semester planning, classrooms, etc.).
- Examples of produced teaching resources (hand-outs / web material / books)
- Results of student evaluations and follow-up.
- How your fundamental pedagogical view influences your teaching.

Knowledge base:

A description of how to acquire relevant knowledge about:

- Central trends in the field of education.
- Research and development work in the field of education.
- Research fields relevant to the field of study.
