

# ODENSE, SYDDANSK UNIVERSITET

## A. ADDRESS

Campusvej 55  
DK-5230 Odense M

## B. HISTORY

241 Cypriote artefacts of the Syddansk Universitet at Odense were published in the 22nd volume of *the Corpus of Cypriote antiquities* (Nielsen *et al.* 2001). Some objects which were not from Cyprus were also described in this volume, since it was believed that the corpus would include all the antiquities in the Syddansk Universitet and it seemed to be an opportunity to present the collection as a whole. It was however later discovered that the collec-

tion of the Syddansk Universitet at Odense comprises many more antiquities than those published in *CCA* 20:22. In the present volume only Cypriote objects, or objects which likely originate from Cyprus, are dealt with.

The basin **868**, the swords **976-977**, the dagger **978**, the knives **979-981** and **984**, and the adzes **982** and **985-986** may have been found in an EC I tomb.

For the history of the collection see *CCA* 20:22, 5.

## APPENDIX 1

### THE CYPRO-SYLLABIC INSCRIPTION ON THE VASE OUKL 99 IN ODENSE

On the neck of the vase are three painted syllabic Cypriote signs, of which the reading is certain for the two signs to the right and very probable for the one to the left: *pa-we-se*.

scale of drawing c. 2.5:1

At the left, what is visible on the photograph is the trace of removed concretion which did not hide any further trace of coloured pigment. We owe this observation to Dr Jens Aagard, conservator of the collection, who helped us very much in cleaning, measuring and drawing the signs and in providing excellent photographs.

The dimensions of the signs are, from left to right, 0.62 x 0.67 cm, 0.46 x 0.58 cm, and 0.44 x 0.63 cm; the length of the inscription itself is c. 2.2 cm. Painted signs of less than one cm height are not frequent but attested (e.g. on a jug in the Colocasides collection, ICS 352a, dating from the same period).

According to Prof. Paul Åström the inscription was probably painted before firing.

The forms of the signs are very simple and only the first to the left deserves some comment, although it is almost impossible to determine if the vertical stroke is cutting the two horizontal ones or not; but this detail does not matter very much, since the two forms are attested: the first one is the most frequent (more than 99%) but the second one is known from Old Paphian (ICS 176a and b, Archaic period) and New Paphian (ICS 3, Classical / Hellenistic period) and also from the common syllabary (ICS 367c, Archaic period; ICS 327, Classical period and from Kafizin, Hellenistic period, where it is the only attested form).

The syllabary is probably the common one, but the three signs (whatever the form of the *pa*, cf. above) exist in Old Paphian and if the *se* opening to the left in a

dextroverse text is rather frequent in Paphian, it is not entirely unattested in dextroverse texts of the common syllabary (ICS 196c, Archaic period, ICS 291 [partim], Hellenistic period, and on some coins from Nea Paphos and Salamis, Archaic and Classical periods).

It is not surprising to observe such an inscription on a vase from the Cypro-Archaic II period (c. 600-475) since we have some painted vase inscriptions from the Archaic period: ICS 18c (Geometric / Archaic period), 158, 254a, 318c, 347 and 348 (Archaic period) and 147 and 352a (Archaic / Classical period).

The reading from left to right is the most probable one: there are more than a dozen words ending in *-we-se* in the corpus but none beginning in *se-we-*. Two of these words ending in *-we-se* are ethnics in the nominative masculine plural (*e-ta-li-e-we-se* /Edaliēwes/, the men from Idalion and *ke-ti-e-we-se* /Ketiēwes/, the men from Kition), most of the others, which may be interpreted, conceal compounds with the second element *\*klewēs* / used as names: [a-]ri-si-to-ke-le-we-se /Aristo-klewēs/, a-to-ro-ke-le-we-se /Andro-klewēs/, ni-ko-ke-le-we-se /Niko-klewēs/, o-po-ke-le-we-se /Omph<sup>h</sup>o-klewēs/?, pi-lo-ke-le-we-se and pi-le-ke-le-we-se /Philo<sup>h</sup>e-klewēs/, sa-wo-ke-le-we-se /Sawo-klewēs/, ti-mo-ke-le-we-se /Timo-klewēs/ and, finally, with the first element partly lacking, *\*-si-ko-ke-le-we-se* and *]ra-ke-le-we-se*. As to *zo-we-se* see below.

The most probable interpretation for *pa-we-se* is */P<sup>h</sup>āwēs* /, which obviously belongs to Alph. Gr. *p<sup>h</sup>āos* 'light'. The name does not occur as such in any of the Greek dialects, but the word family is attested in Cyprian onomastics: *pa-wo-se* /P<sup>h</sup>awōs/ (Kouklia 14), which matches the nominative form of the noun (Homer +), probably with the variants *pa-wo* ICS 159 and *pa-u-o* ICS 328 (both gen. /P<sup>h</sup>āwō/ of a short form /P<sup>h</sup>āwos/, cf. O. Masson, BCH 103, 1979, 81; A. Heubeck, Kadmos 26, 1987, 120f.), and *pa-wo-ta-u* (gen.) /P<sup>h</sup>āwōtau (Kouklia 39), as well as the compound *pa-u-ta-mo-se* /P<sup>h</sup>au-dāmos/ ICS 389. Compounded names with *pa-u-si<sup>o</sup>* can both conceal /P<sup>h</sup>ausi<sup>o</sup>/ and /Pausi<sup>o</sup>/.

It is a remarkable fact that both *pa-wo-se* /P<sup>h</sup>awōs/ and now *pa-we-se* /P<sup>h</sup>āwēs/ coexist in Cypriote syllabic texts. The use of the neuter *p<sup>h</sup>āwos* as a noun (nickname) has parallels in Alph. Gr. *Astēr* ('star'), *Spintēr* ('spark') or Myc. *a<sub>3</sub>-ka-ra* (if /Aiglā/ 'light, radiance'). On the other hand, MN /P<sup>h</sup>āwēs/, with its *-e-* vocalism, can be understood as a short form of a second element *\*p<sup>h</sup>āwēs* corresponding to the neutral *-o/es-* stem of the regular type Alph. Gr. *Eu-p<sup>h</sup>āwēs*, *Pam-p<sup>h</sup>āwēs*, *Polu-p<sup>h</sup>āwēs*. Simplicia in *-ēs* (eventually remodelled to *\*-ē-t-*) beside neuters in *\*-o/es-* (and compounds with second element in *-ēs*) are well attested in Greek, e.g. *Mēnēs* (also *Menēt-*, gen. *Mēnētōs*) to *mēnos* 'power, internal force' (: MN *\*mēnēs*), *Krātēs* to *krātos* 'power' (: MN *\*krātēs*), *Kállēs* to *kállōs* 'beauty' (: MN *\*kállēs*), *Télēs* to *télos* 'duty', also 'army' (: MN *\*télēs*), *T<sup>h</sup>ālēs* (also *T<sup>h</sup>ālē-t-*, gen. *T<sup>h</sup>ālētōs*) to *t<sup>h</sup>álos* 'shoot, sprout', in metaphoric sense for children since Homer

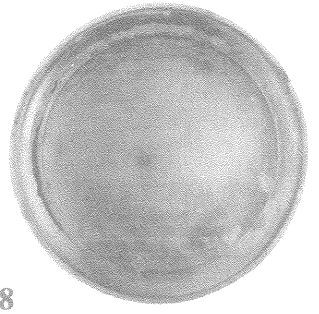

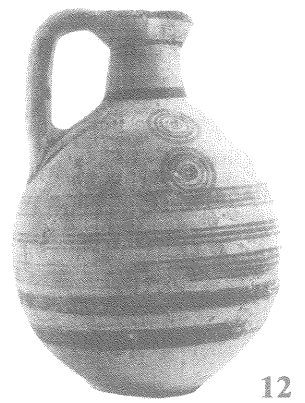

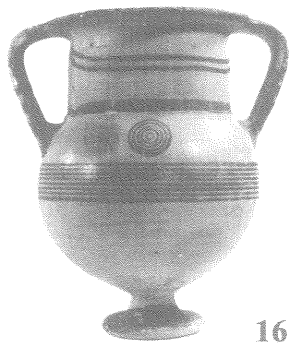

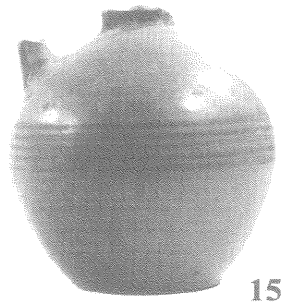

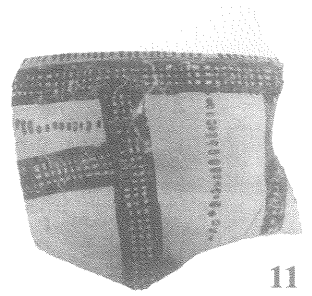

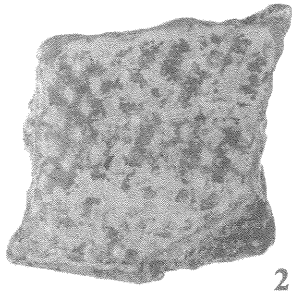

(: MN <sup>o</sup>*t*<sup>h</sup>*alēs*); cf. also *Pákhēs* (gen. *Pák<sup>h</sup>etos*) to *pák<sup>h</sup>os* 'thickness' (Hom.), *pák<sup>h</sup>ús* 'thick'.

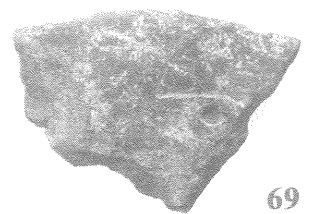

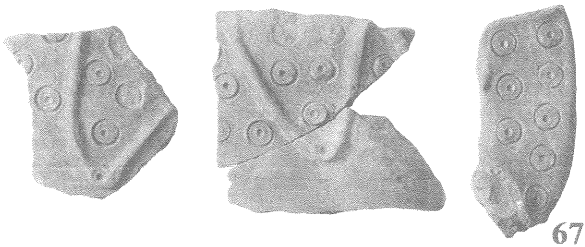

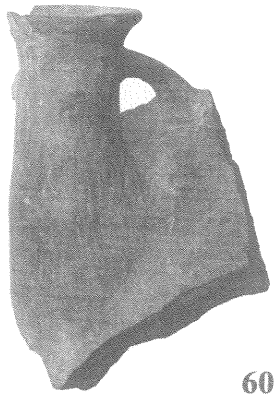

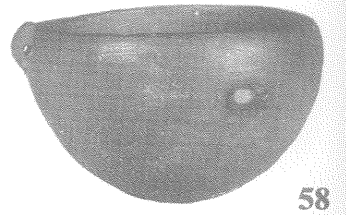

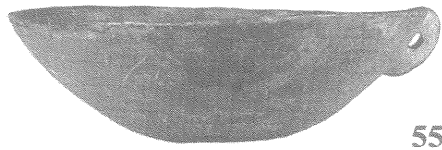

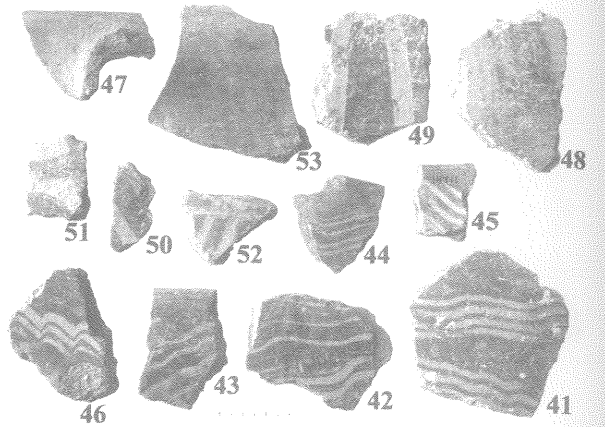

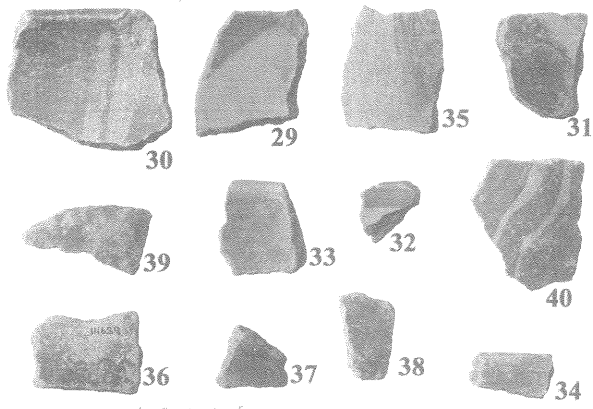

Two close parallels to *pa-we-se* /*P<sup>h</sup>awēs*/ are actually found in Cyprian itself: *ke-ne-se* /*Genēs*/, ICS 352a.B 1 (: gr. *génos*, cf. G. Neumann, *Kadmos* 17, 1978, 167f.) along with one compound in /<sup>o</sup>*genēs*/, *sa-ta-si-ke-ne-se* /*Stāsi-genēs*/ ICS 352a. B4 and *ta-le-se* /*T<sup>h</sup>alēs*/ ICS 257, cf. *o-ro-wo-ta-le-se* /*Orwo-t<sup>h</sup>alēs*/ ICS 352a. A4, *ku-po-ro-ta-le* /*Kupro-t<sup>h</sup>alēs*/ (*Kouklia* 7). Other Cypriote names in *-ēs*,

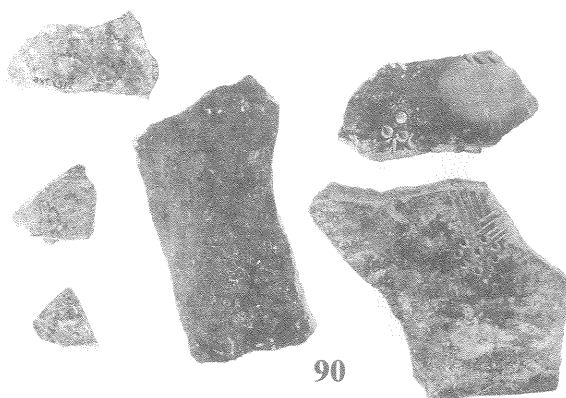

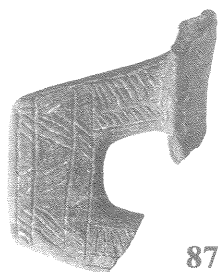

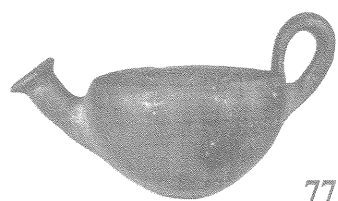

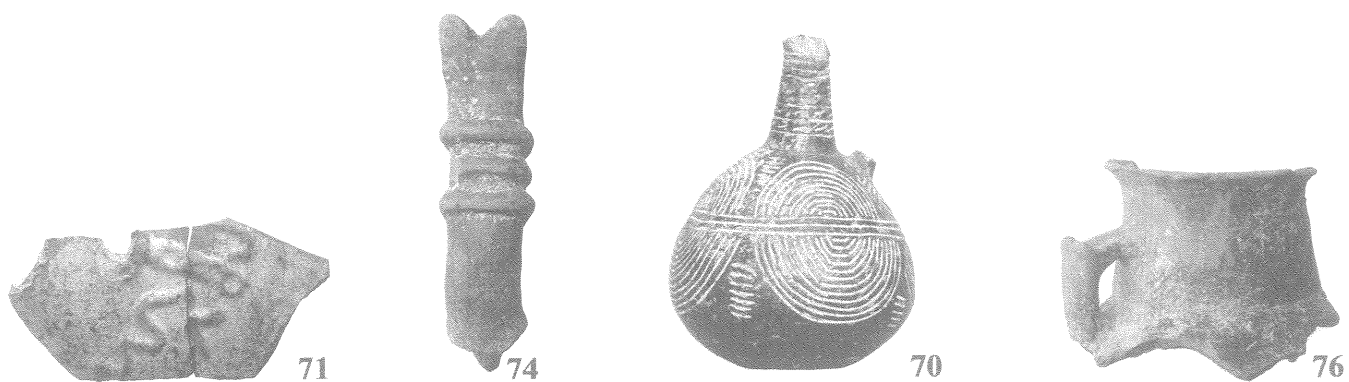

which are not based on *-o/es-* stems, do not actually belong to the same type as /*P<sup>h</sup>awēs*/, /*Genēs*/, /*T<sup>h</sup>alēs*/ and the like: the MN *a-ke-se* /*Āgēs*/ ICS 364 (: Alph. Gr. *Āgeús*) and the MN *zo-we-se* /*Zōwēs*/ ICS 405.1.2, 406 (Alph. Gr. *Zōwēs*; *Zōwē-t-* in Pamphylia) are short forms of /<sup>o</sup>*agos*/ and /*Zowo<sup>o</sup>*/ built by means of a hypochoristic suffix *-ē-* attested also in other regions, e.g. *K<sup>h</sup>ārēs*, *P<sup>h</sup>érēs* and the like.
