UVU Meeting Feb. 28, 2025

Participants:

William Elbæk Mistegård <wem@imada.sdu.dk>

Marcus Visbak Barfoed <mabar21@student.sdu.dk>

Tobi Walmsley <towal21@student.sdu.dk>

Ralf Zimmermann <zimmermann@imada.sdu.dk>

On MM500 (co-read with MM569 Studieintroduktion for sidefag)

Responsible teacher: Chunfang Zhou

Idea:

- Bring study intro closer to the subject area
- Reduce workload for TAPs from NAT faculty
- Side remark: sustainable development goals (SDG) are no longer a must

Ideally, use study introduction to create "strong binds" and a "sense of belonging" for the students, so that the risk for drop-out is reduced.

! Short time frame !

The new version of MM500 is expected to be up and running in fall 2025.

What do we want to have/keep, what works well?

- LaTeX is important, maybe even extend the intro to LaTeX
- Use MM500 to show relations and dependencies between courses (present and upcoming)
- Connection to competence portfolios

What do we not want to keep?
