

October 3rd you have the chance to meet and be introduced to the work of professor Hongjin Sui, recently appointed adjunct professor in Anatomy and Neurobiology at the Department of Molecular Medicine, the Faculty of Health Sciences, University of Southern Denmark (invitation attached).

Born in China 1965 Professor Hongjin Sui was appointed professor in anatomy at Dalian Medical University in 2000. Today he holds the position as Director of the Department of Anatomy at Dalian Medical University as well as the positions of Vice Chairman of the Chinese Anatomy Society, Chairman of the popular Science Popularization Committee of the Chinese Anatomy Society and Senate of the International Society of Plastination.

Professor Hongjin Sui took the lead in introducing the plastination technique in China and is founder of the first “[Mystery of Life Museum](#)” in the world. He has won many national and provincial Science and Technology Progress Awards and has published more than 100 papers, 10 books and anatomy atlases. Besides that he has been awarded the Chinese National Prize for the Development of Science and Technology, which is the highest prize for scientist in China.

Professor Hongjin Sui is a win to the Department of Molecular Medicine’s work in the field of plastination and he looks forward to contributing to this work by helping build a good plastination unit, working together with the department in clinical anatomy research and for publications for popular scientific books as well as teaching books.

We hope to see many of you at his inaugural seminar October 3rd!
