

# ErgoShip 2023

## ***Maritime research – Maritime Human factors***

**2-3 November 2023**

**University of Southern Denmark, Esbjerg Campus**

### ***The Centre of Maritime Health and Society is the host of this years conference***

The Centre of Maritime Health and Society at the University of Southern Denmark is hosting ErgoShip 2023, a maritime human factors conference. The conference will be held in Esbjerg, Denmark 2-3 November 2023, with a cocktail reception on the evening of 1 November.

ErgoShip 2023 aims to provide a national and international forum for the dissemination and exchange of applied scientific knowledge in the field of human factors within a maritime context. The target audience will be shipowners, operators, seafarers, researchers, maritime regulators, classification societies and other maritime stakeholders with a particular interest in maritime human factors. Participants are invited to contribute with a broad spectrum of topics relating to the human element in ship and equipment design, shipping operations or research.

### **The 5th ErgoShip conference**

The history of the ErgoShip conferences dates back to 2011 when the first ErgoShip was held on 14-16 September 2011 in Chalmers University of Technology, Göteborg, Sweden. The second ErgoShip conference was held in Melbourne, Australia on 6-7 April 2016. It was jointly hosted by the Australian Maritime Safety Authority (AMSA) and the Australian Maritime College (Institute of the University of Tasmania).

ErgoShip 2019 was the third in the series and was held on September 24-25 in Haugesund, Norway. It was hosted by Western Norway University of Applied Sciences.

ErgoShip 2021 was organized by the Korea Institute of Maritime and Fisheries Technology in Busan, Republic of Korea.

*ErgoShip 2023 is now returning to Europe (Scandinavia) with the Centre of Maritime Health and Society as organiser. This conference will be the fifth in the series.*
