4	Body and Public Health
5	Determinants of Health
6	Epidemiology
7	Health Behaviour
8	Health Care Systems and Health Policies
2nd year	
9	Theory of Science
10	Qualitative and Quantitative Methods
11	Population Health and Demography
12	Health Sociology, Settings and Planning

Course contents

Health Education and Promotion

Here we deal with building effective strategies and programs to:

- ⊕ develop personal skills
- ⊕ create supportive environments
- ⊕ strengthen community action
- ⊕ build healthy public policies
- ⊕ reorient health services and educational strategies

Epidemiology

Epidemiology is the study of distributions, causes and consequences of health and disease in human populations. The education will focus on important public health challenges and high risk populations. It will give a thorough training in:

- ⊕ epidemiology terminology and concepts
- ⊕ study designs and analytical approaches
