

Equilibrium selection in Hawk-Dove games

June 6th, 2019

14:00–15:00

Room 1A+1B

Mario Blázquez de Paz, Post-doc, Norwegian University of Science and Technology

Dr. Mario Blázquez is a postdoc at the Norwegian University of Science and Technology. He received aMSc. in Economics from the European University Institute in Florence, and a PhD. in Economics from the University of Bologna.

His research is on the design of electricity markets in the presence of transmission constraints. He studies the importance of transmission tariffs, the allocation of transmission rights or the design of re-dispatch mechanisms determining suppliers' market power, consumers' welfare and the flow of electricity. In his research, he uses mainly economic models, but also experiments and operation research models.
