

Exam Monitor

macOS Monterey & Big Sur

Updated May 2023

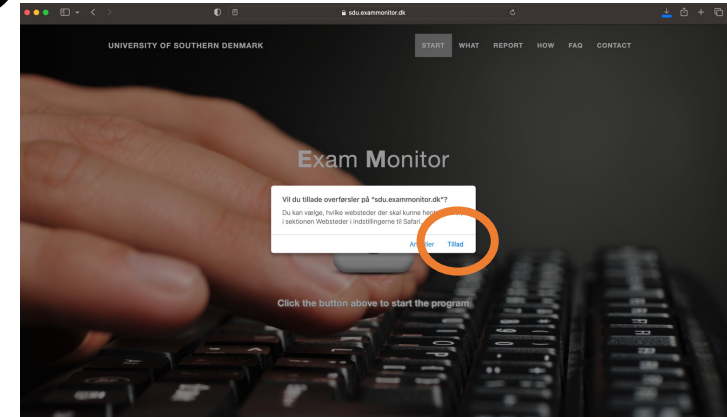

1 First, download Java from java.com

2 Go to em.sdu.dk and click on the Exam Monitor logo to download it on your computer

3 Click on 'Allow'

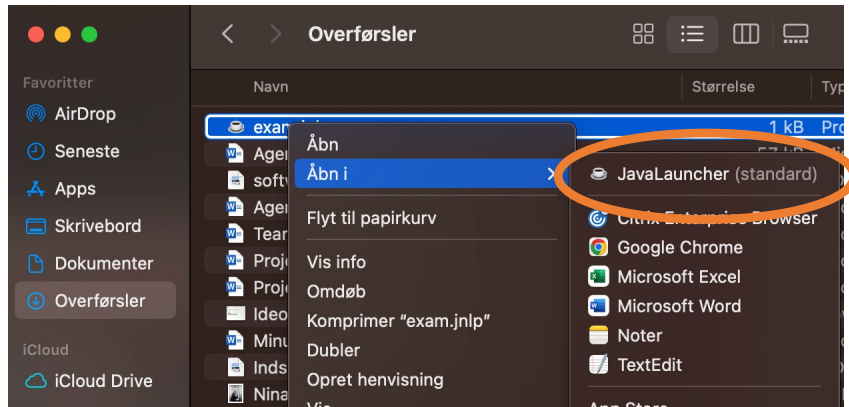

4 Open 'Finder' on your Mac

5 Click on 'Downloads' and find the file 'exam.jnlp'

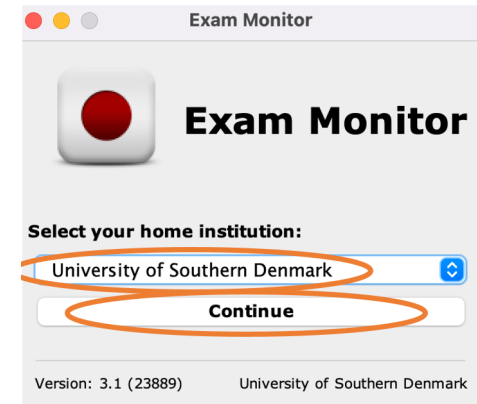

6 Right click on the file. Choose 'Open with' and click on 'JavaLauncher'

7 Click on 'Run'

8 Choose 'University of Southern Denmark' and then click on 'Continue'

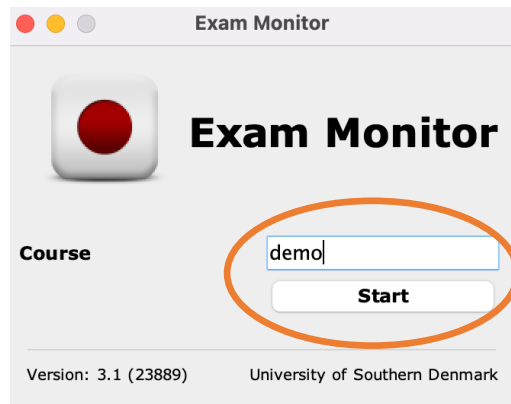

9

Log in with your SDU-mail and password

10

To test Exam Monitor before your exam, type in 'demo' and click 'Start'

11

Do only confirm this window, when the right screenshot has been taken. On the next page you will find the perfect screenshot

Correct privacy settings

It is important and **your** responsibility that Exam Monitor is setup correctly on your machine.

Verify with the screenshot above of **your computer desktop** that other windows besides Exam Monitor are visible.

If screenshot does **not** show other windows besides Exam Monitor **contact an invigilator and request IT-support.**

You can retake the screenshot with the button below to verify settings are correct.

Screenshots used in this window will not be saved.

I confirm that my computer is correctly setup and that image above verifies these settings.

On the next pages, you will find out how to take the perfect screenshot

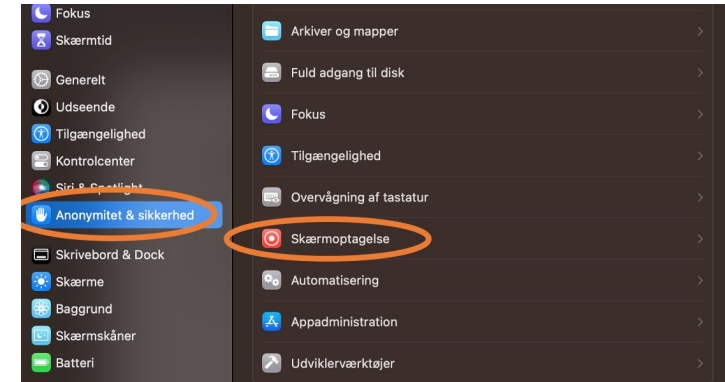

12

To make your Exam Monitor take the perfect screenshot, please follow the upcoming steps otherwise it won't record your screen. Go to 'System preferences'

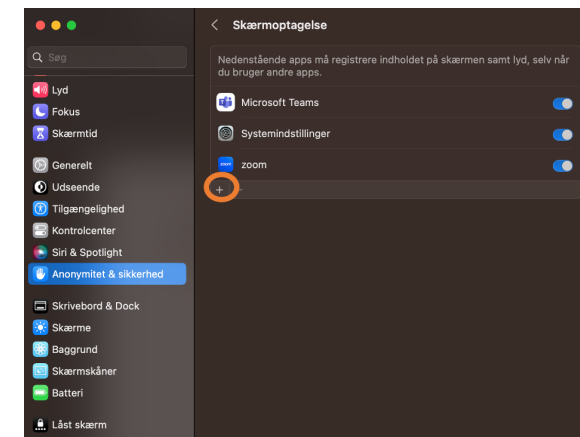

13

Click on 'Security and privacy' and click on 'Screen recording'

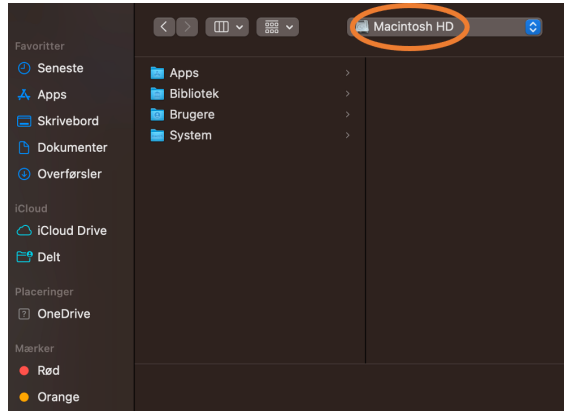

14

You have to add 'Java' to the list otherwise it won't record your screen. Click on '+'

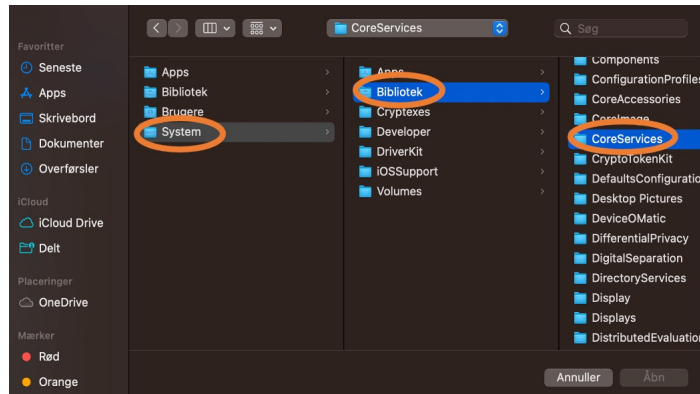

15

Choose 'Macintosh HD'

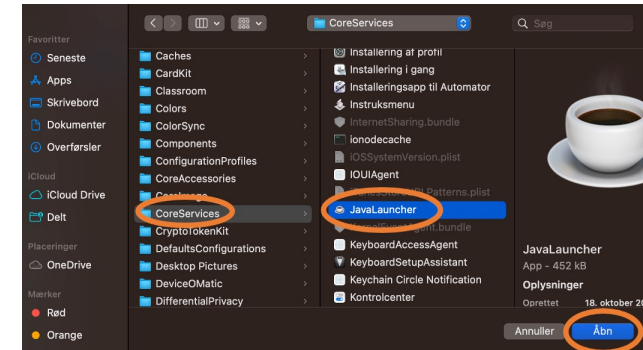

16

Click on 'System', then 'Library' and 'CoreServices'

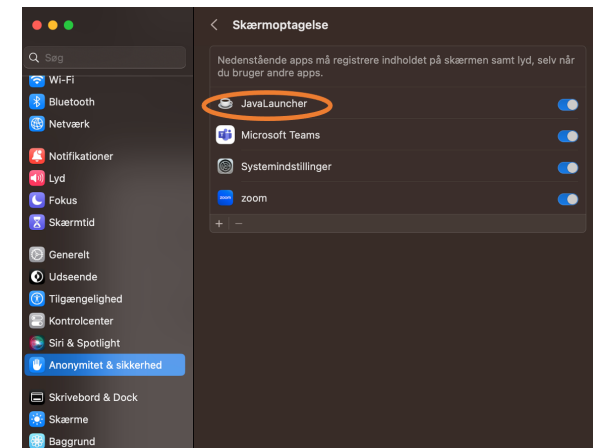

17

Find 'JavaLauncher' on the list (scroll down), then click on 'Open'

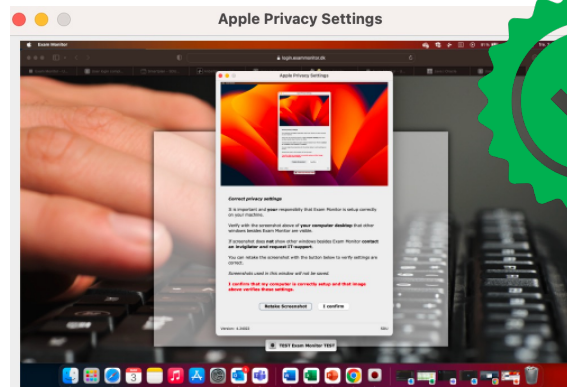

18

Java has now been added to the list. It has to be turned on, in order to work as shown below

19

When Java is switched to on, you can retake the screenshot and the perfect screenshot will be shown
