

Titel

What is a game and who are its players?

Underviser

Navn	Anders Risager Kristensen
Uddannelse	Civilingeniør i spiludvikling & læringsteknologi

Introduktion til undervisningen

Dear student,

Defining a game can be a very difficult task and it is something that the academic world has been trying to do for decades. The big question is: what is the difference between play and game? Or is it in fact the same thing? This question will we jointly try to answer, and I will already now reveal that it is not going to be easy because modern technology has made it even harder to distinguish between them.

Afterwards we will try to understand who plays games and more importantly why? We will do that by researching ourselves.

Finally we will use our new knowledge to create a mini game of our own.

I promise to challenge (or at least I will try) your definition of a game and give you some ideas on how we can use game theory in the classroom

Until we meet take care of one another and please bring your favorite game.

Forberedelse (svarende til max. 15 minutters forberedelsestid)

Before we meet, I would like you to note down what games you play and why you enjoy playing them. Also as I just mentioned please bring our favorite game or just a game of yours. It can be a board game, card game or similar. Every game is accepted as long as it is physical and not digital.
