News

- **Support for funding applications**

In order to strengthen the University of Southern Denmark's potential to take home funding from the European Research Council (ERC), the Executive Board has decided to support the researchers who are applying funds from the ERC. Support will be in the form of financial support to resubmit an application which has been accepted in the application process, but then rejected. In addition, a mentoring scheme is established for candidates who are applying for Starting Grants and Consolidator Grants, and who would like to improve their chances to perform well at the ERC interview. The interview is part of the application process for these instruments. The regulations will take effect in the next application round in 2014.

Since the next ERC call is not expected until early to mid-2014, support is offered - for a limited period (autumn 2013)- for applications to the Danish National Research Foundation (Centers of Excellence), The Danish Council for Strategic Research (strategic research centers) and The Danish National Advanced Technology Foundation (Advanced Technology Platforms). In order to obtain support, it is a condition that the projects in question are larger projects, where the applicants apply for a substantial amount of money to research at SDU.

Further information can be found [here](#).
