SEBE Department Seminar

6 June 2018

Time: 14.00–15.00 Room: 1A+B

Agent-based modeling and simulation as a third way of doing science: Examples from the field of innovation and technology management

Christian Stummer Bielefeld University, Department of Business Administration and Economics, Bielefeld, Germany

Dr. Christian Stummer holds the Chair of Innovation and Technology Management at the Department of Business Administration and Economics at Bielefeld University, Germany. He received a doctoral degree in economics and the social sciences from the University of Vienna, where he later-on also held a faculty position.

His research interests in particular include R&D management, market diffusion of innovations, and economic implications of smart products. His works have been published in academic journals such as IEEE Transactions on Engineering Management, European Journal of Operational Research, Decision Support Systems, Technovation, and the International Journal of Innovation Management. Overall, he has published more than 90 papers in peer-reviewed journals or proceedings.

Christian Stummer currently is Co-Editor of the Central European Journal of Operations Research and member of the editorial board of the EURO Journal on Decision Processes, which reflects his methodological research approach in which he strives to model real-world problems and then to use these models to provide decision support.
