

## BSc in Environmental and Resource Management

### International Undergraduate Exchange Programme – Environmental and Resource Management

#### Offered at Campus Esbjerg

#### Profile

The International Undergraduate Exchange Programme in Environmental and Resource Management offered at Campus Esbjerg runs in the autumn semester from the 1<sup>st</sup> of September and contains a range of courses from the Bachelor programme at the Campus.

Besides this exchange program the campus also offers an exchange programme in Sociology and a programme in Economics and Business Administration.

The exchange programmes at Campus Esbjerg have been running for many years and students from Europe, North America and Asia have attended.

#### Why choose an International Undergraduate Exchange Programme in Environmental and Resource Management?

The programme combines applied economics courses in the environmental and resource management field with business administration courses.

The courses in the International Undergraduate Exchange Programmes combine theory and practice to ensure a solid theoretical basis and practical tools employable at your home university and later in your first job.

The courses use a combination of group work, project work and lectures. The classes are relatively small in regards to number of students, allowing for interaction with the professors lecturing as well as discussions among students. This is beneficial for your professional development as it enlarges the size of the active vocabulary which you can later use in discussing issues related to these fields as a part of your job.

Finally, you broaden your horizon because you meet and cooperate with students from other cultures as well as from other studies.

Campus Esbjerg is a part of the University of Southern Denmark. The campus is situated in green surroundings close to the town centre of Esbjerg (a city with app. 80,000 inhabitants) which offers cultural, sporting and leisure activities, and a lively nightlife.

#### Students say:

"I wanted to add that I had a great time during my exchange semester at your University. It has been an amazing experience, and I was asked to represent your University at our Going Abroad Fair, so I will have some great things to tell other students".

"I love this university, as it offers a very modern study environment, a great study support and many events. The people are so friendly, helpful and supportive".

"In the beginning I was afraid to study in English, but as the study environment was really relaxed and interactive, I got encouraged to speak more and my English has improved a lot."

#### Structure

30 ECTS = 1 semester's workload

#### Courses in the programme (autumn 2018)

- |   |         |
|---|---------|

#### Entry requirements

- To follow courses at bachelor level you must have completed at least one year of studies (i.e., 60 ECTS).
- You must meet the entry requirements of the courses you wish to follow. You find the entry requirements in the description of the relevant courses.
- You must have English skills compared to the Danish B level in English. Exchange students can document it as follows:  
As an EU/EEA, Nordic or Swiss citizen, you can document it by way of an upper intermediate level in English through your secondary school diploma (min. 210 hours at high school level), or an IELTS score of min 6.5 or a TOEFL of min 575/230/88.  
Applicants with a non-EU/EEA, Nordic or Swiss citizenship must document their English skills with a TOEFL or an IELTS test.
