

3D neutron and x-ray imaging center:

Competence center with infrastructures, industry portal, education and innovation. Science Hub.

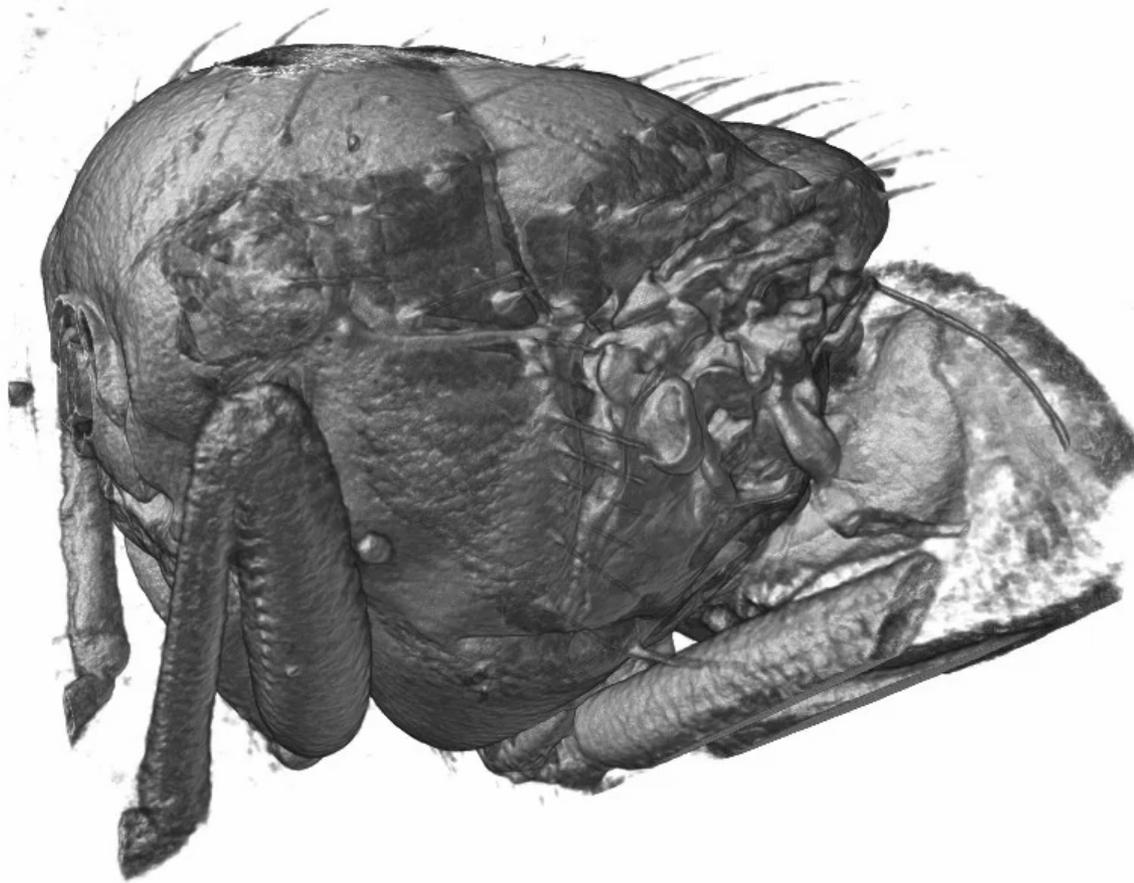

DTU
3DIM/DANFIX 2020
10 instruments for hard+bio

ESS
ODIN >2022
BEER >2022

MAX IV
Hard: DanMAX 2020
Bio: BioMedMAX 2021?

ESRF
Hard: Hard x-ray Microscope 2020
(Bio: Several leading beamlines)

Ultrafast imaging at synchrotrons

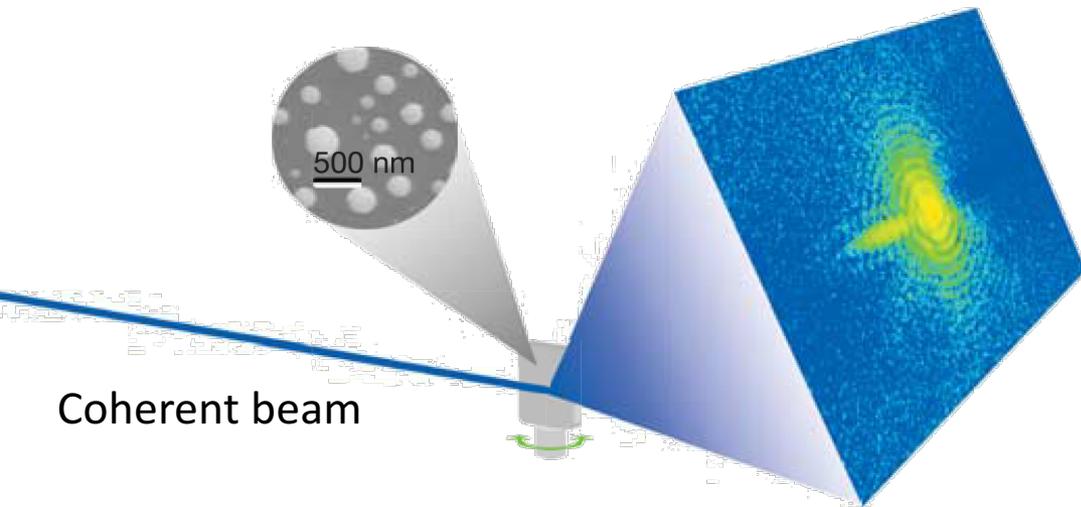

New rings

3D mapping in sub-mili seconds

Work done at TOMCAT, PSI, CH

CDI: >10 nm resolution for small particles and cells

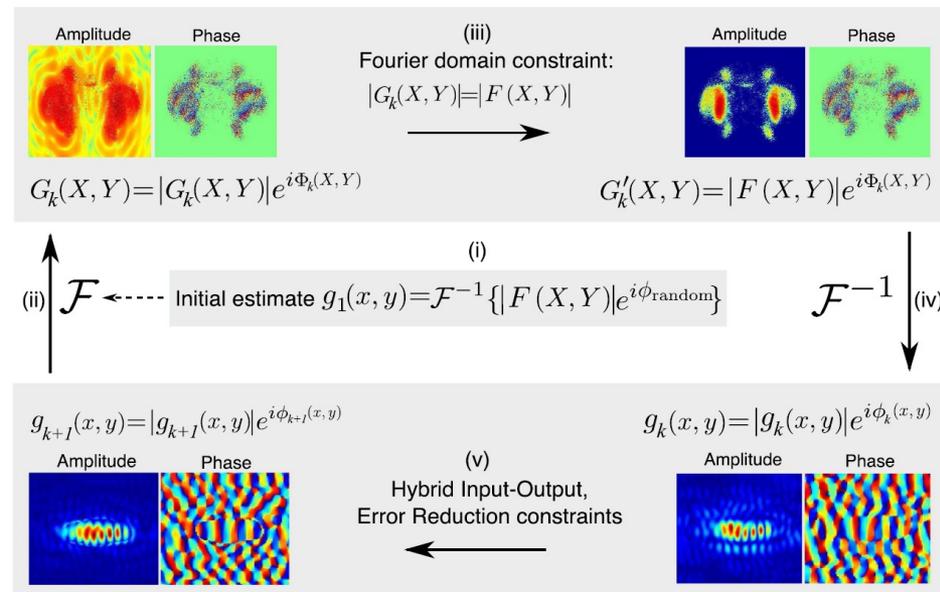

Diffraction pattern +
Size of particle

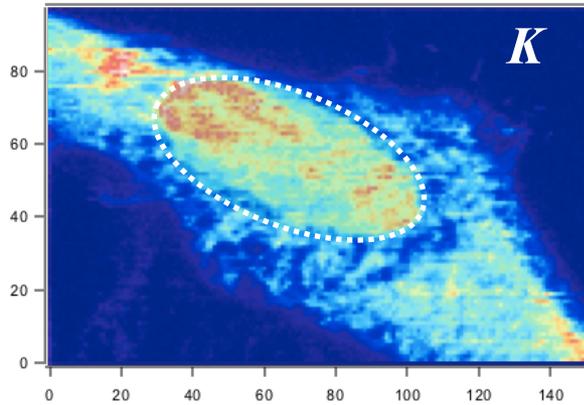

Iterative algorithms

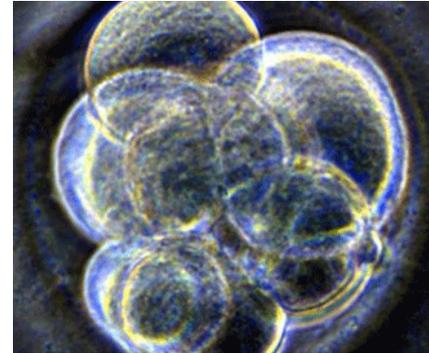

3D map

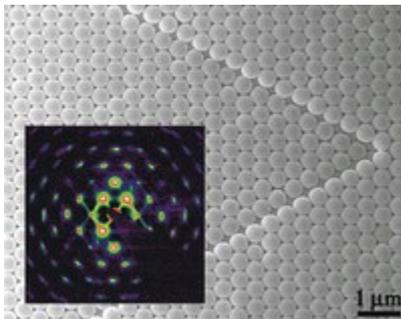

X-rays going nano

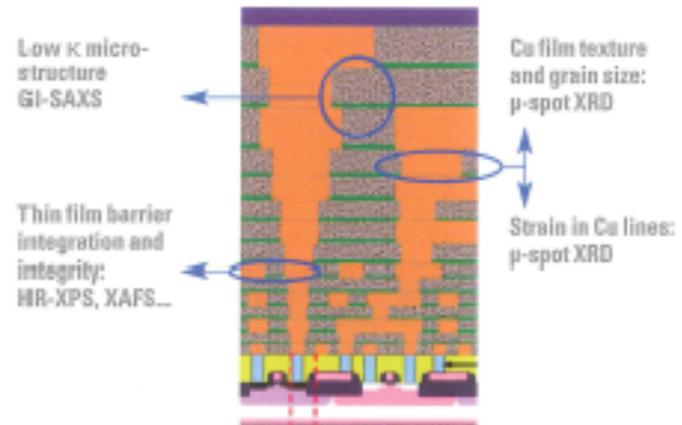

Parkinson in neurons

Embryos

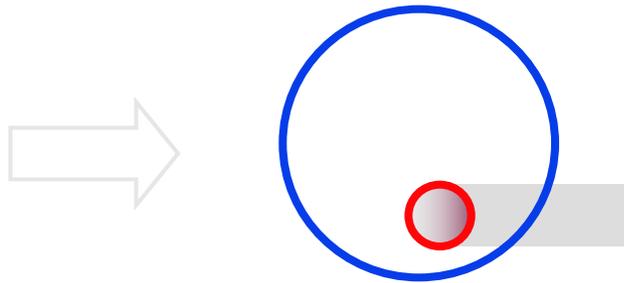

Colloidal photonic crystal

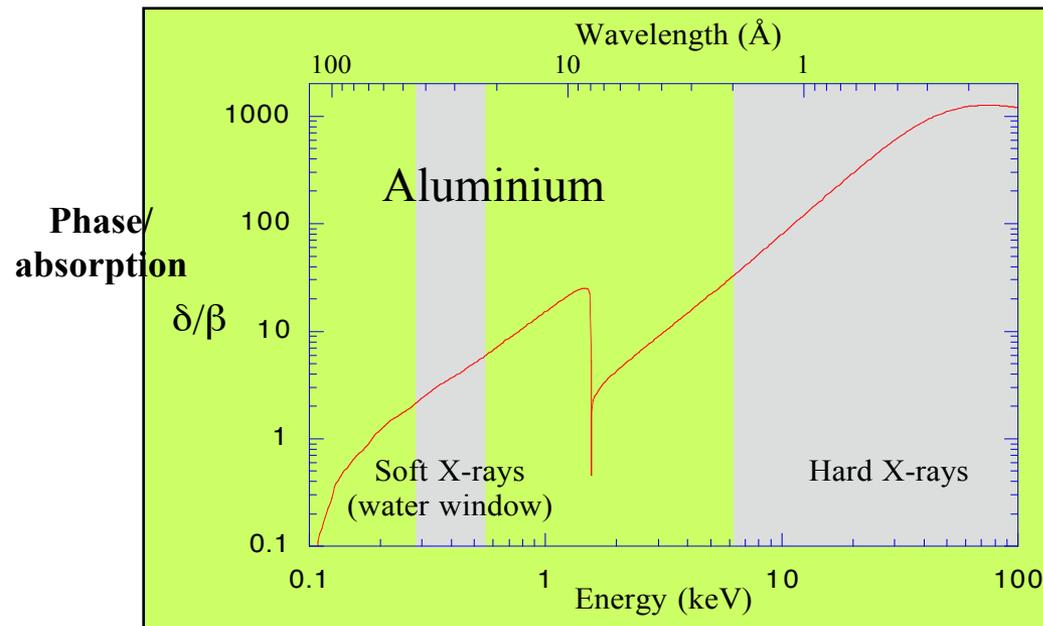

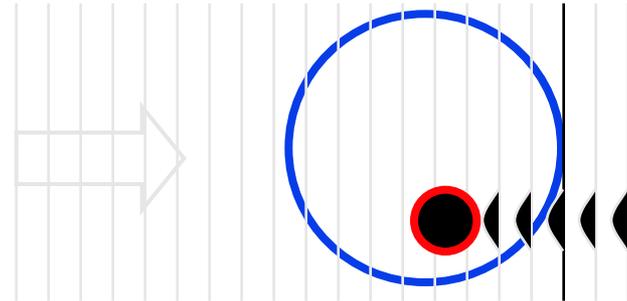

Micro-electronics

Phase Contrast Tomography

Absorption

Phase

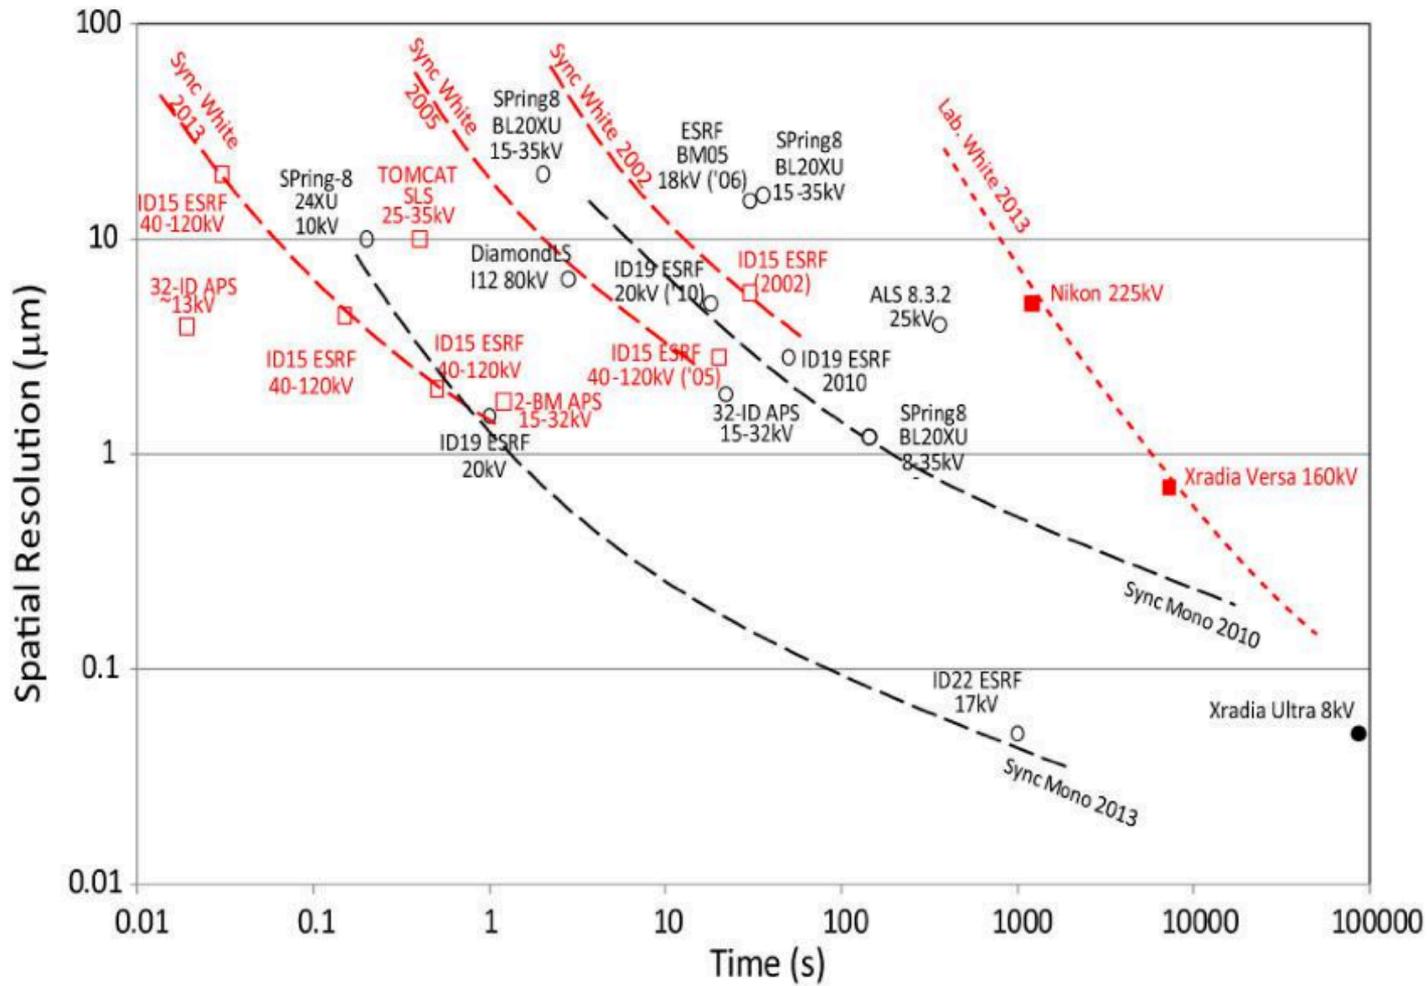

Smallest detectable hole at 25 keV
in a 4 mm thick sample:

Absorption: 20 μm

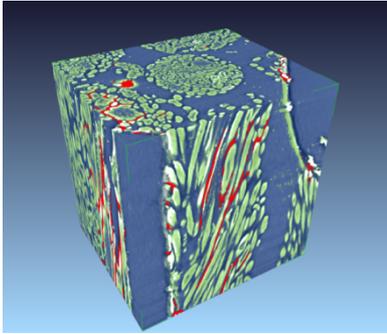

Phase: 0.05 μm

Absorption contrast tomography performance

Now: 50 nm routinely reached

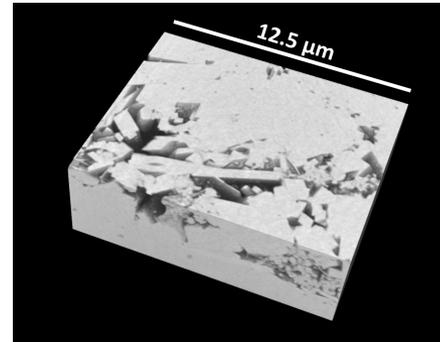

DANFIX user community

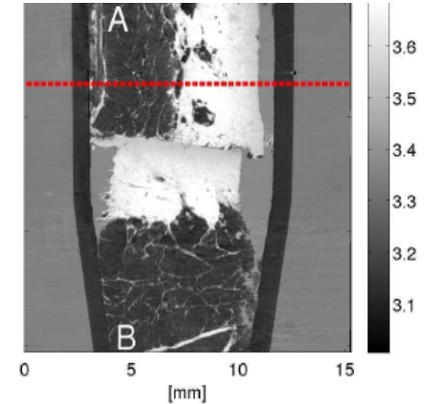

Polymer composites

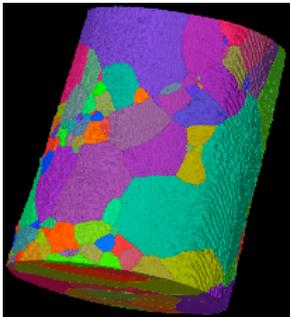

Energy technologies

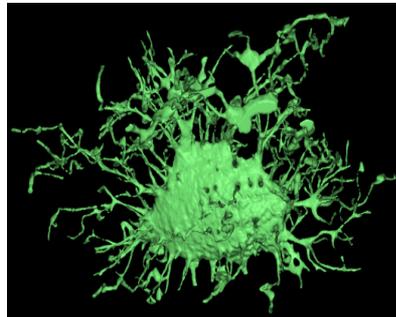

Geoscience

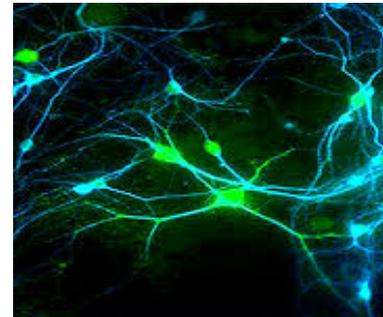

Food
